Welcome & Opening Remarks

Lorenzo Massart, *EVP of Strategy & ECM, Auna*

Good morning, everyone, and welcome to the 2026 Auna Investor Day. It's very nice to see a lot of familiar faces here in Lima, and it's also great to welcome everyone who is joining us via the webcast.

For people who need a translation, use the headphones on your tables. There is a simultaneous translation, because the majority of the presentation is in English.

So, over the next few hours, you will hear how Auna is building an integrated healthcare platform across Latin America, expanding access, improving outcomes, and creating sustainable value for patients, partners and shareholders. Our management team will share how we are combining the strength of our network, our patient-centered model and disciplined execution to drive sustainable growth and capture the opportunity ahead of us.

We will also discuss the progress we are making, the challenges we are addressing and the priorities that will shape Auna in the next phase.

But before we get started, you can read this nice statement on the screen.

Please note that today's discussion will include certain forward-looking statements, which are based on management's current expectations and beliefs and are subject to a number of risks and uncertainties that could cause actual results to materially differ. Please direct your attention to the Safe Harbor Statement on the screen, which investors should read carefully. It also can be found in our press release published earlier this morning, along with our filing with the SEC.
In addition to discussing financial results in accordance to IFRS, we will discuss certain non-IFRS financial measures. Definitions and reconciliations are included in the presentation.

Today in the room, in person, we have Suso Zamora, our President and Executive Chairman; Gisele Remy on the far right, our CFO; Rayet Harb, our COO; and Vicente Checa, our leader of our Peruvian operations; and obviously, myself. You will also hear from our leaders in Mexico and Colombia, who are not with us today. You will hear from Alejandro Torres and Pablo Cervera, respectively, for Mexico and Colombia.

We're very excited about the agenda that we have today. Following the presentations, we will have a Q&A session. For those participating on the webcast, you may submit your questions at any time during the presentations by using - there should be a box directly

below the broadcast screen, ‘Ask a Question’. Just put your question there, and we'll address them at the end.

Also, at the end of the day, we're going to appreciate if you can give us feedback on today's event by completing a brief survey. For the people in Lima, there is a QR code on your tables that you can fill, and for people on the webcast, there is a resource tab at the top of your screen, and you can complete the survey. At the end of each of the presentations today, the presentations will be available on our investor relations website, as we present.

Now let's start the session. We're going to start with a quick video on Auna, and with that, I will turn to Suso.
